More Than A Pool

Water Dreams
BEACH POOLS

A sensory journey awaits you, a deep immersion in a place where water and nature dissolve into each other, shaping an experience where man and the environment breathe in unison.

Bio.design beach pools are more than just bodies of water: they are authentic corners of well-being, where stones and quartz intertwine in a silent and endless dialogue. Each curve, each material element straddles the line between design and nature, conceived to offer a unique experience.

Surrender yourself to the shapes that caress the eye, the subtle nuances that capture the dancing reflections. Each image is a whisper, an invitation to dream, a promise of tranquillity that only the essence of a Bio.design pool can deliver.

Welcome to the world of Bio.design: more than a pool.

BIO.DESIGN FINISHES

Bio.design coatings

A silent dialogue between nature and shape. Surfaces that evoke the primordial tactility of stone and quartz, the fluid caress of sand, composing a space where matter becomes experience.

Bio.design coatings are not just finishes, but a living, breathing skin, with water flowing through it and creating a sensory journey.

A liquid architecture that invites you to reconnect with the essential, where water and earth meet in perfect balance.

Mylago Classic

Bio.design finish coating

The Mylago coating is designed to evoke the turquoise and crystalline hues of the waters of the Ticino river, from which the precious granulate is extracted. This material blend, combined with a careful selection of various types of quartz, gives the surface a touch of nobility and prestige. The result is a coating that recalls the natural beauty of the Alpine waterways and transforms each pool into an architectural work that combines aesthetics, quality, and durability.

The sophistication of essential elements, light that bounces off these small fragments, creating colour effects that vary according to the angle and time of day, giving the pool a vibrant, Protean beauty. It is a natural weft, made up of small details that impart a textured and authentic feel, in perfect harmony with the water that surrounds them.

Expansion joints

Expansion joints are essential aesthetic elements to ensure the durability and structural efficiency of Bio.design pools. They absorb structure movements due to changes in temperature, dynamic loads and ground settlements.

BOTTICINO

Composed of small dolomitic marble gems, a natural aggregate consisting of rhombohedral Dolomite crystals with the presence of calcitic granules in soft shades. This blend is used to make the Botticino joints, which, combined with our coatings, recreate a reflecting pool with clear, bright colours.

DUNA

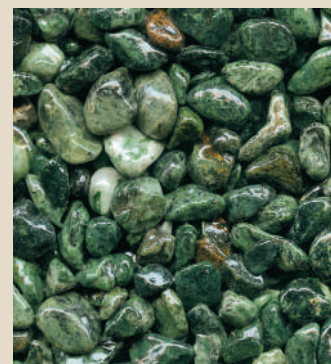

Each individual pebble, with its unique hues and rounded shape, contributes to a cosy and natural atmosphere, evoking the beauty of the mountain ranges' waterways. Duna is one example of the many options available to make your Bio.design pool unique. Duna joints offer an explosion of different colours that range from orangey yellow to white and from salmon pink to dark grey. It is composed of a skilfully mixed fusion of pebbles from two thousand-year-old watercourses, the Rhine and the Ticino.

TICINO

A fine pebble blend, used to line the expansion joints of our beach pools. A textural blend born in the Ticino river, with small marble gems of alluvial origin, shaped by the rushing waters. The Ticino pebble is a varied palette of earthy colours, tending to brown, evoking the watercourses of the mountain ranges. Each individual pebble ball, with its unique hues and rounded shape, contributes to the cosy and natural atmosphere of the pool.

VERDE ALPI

Made from an aggregate composed of serpentine green fragments, it is used for expansion joints and is redolent of the natural beauty of a mountain environment. The warmth and purity of limestone are fused with the quality of emerald marble, creating a new material. The marble, from the Western Alps of the Aosta Valley, is skilfully worked to obtain small, polished pebbles that enrich the pool's joints, amplifying the sensory experience.

Mylago Gold

Bio.design finish coating

A blend of natural quartz and yellow spherical quartz, extracted from the French Alps. This coating, with its characteristic straw-yellow colour, forms a surface that can recreate the chromatic reflections of faraway seas, giving brightness and shine to the pool.

The light of the seas. Each grain, moulded by time and water, shines, with its natural shades ranging from bright white to cream and delicate golden hues. In a single moment you are transported to the beaches of Sardinia, the Maldives or Hawaii...close your eyes and dream.

Expansion joints

Expansion joints are essential aesthetic elements to ensure the durability and structural efficiency of Bio.design pools. They absorb structure movements due to changes in temperature, dynamic loads and ground settlements.

BOTTICINO

Composed of small dolomitic marble gems, a natural aggregate consisting of rhombohedral Dolomite crystals with the presence of calcitic granules in soft shades. This blend is used to make the Botticino joints, which, combined with our coatings, recreate a reflecting pool with clear, bright colours.

DUNA

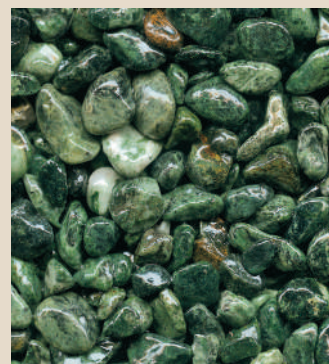

Each individual pebble, with its unique hues and rounded shape, contributes to a cosy and natural atmosphere, evoking the beauty of the mountain ranges' waterways. Duna is one example of the many options available to make your Bio.design pool unique. Duna joints offer an explosion of different colours that range from orangey yellow to white and from salmon pink to dark grey. It is composed of a skilfully mixed fusion of pebbles from two thousand-year-old watercourses, the Rhine and the Ticino.

TICINO

A fine pebble blend, used to line the expansion joints of our beach pools. A textural blend born in the Ticino river, with small marble gems of alluvial origin, shaped by the rushing waters. The Ticino pebble is a varied palette of earthy colours, tending to brown, evoking the watercourses of the mountain ranges. Each individual pebble ball, with its unique hues and rounded shape, contributes to the cosy and natural atmosphere of the pool.

VERDE ALPI

Made from an aggregate composed of serpentine green fragments, it is used for expansion joints and is redolent of the natural beauty of a mountain environment. The warmth and purity of limestone are fused with the quality of emerald marble, creating a new material. The marble, from the Western Alps of the Aosta Valley, is skilfully worked to obtain small, polished pebbles that enrich the pool's joints, amplifying the sensory experience.

Smeraldo

Bio.design finish coating

The Verde Smeraldo coating originates in the mountains of Alta Valtellina, from a vast vein of magmatic-thermal quartz. This textural blend, enriched with olivine quartzite, brings to mind the intensity and sophistication of emeralds, with shades ranging from grey to milky white. The brightness of the sun enhances the sinuous shapes of Bio.design pools, casting unique and fascinating reflections on the water.

The true essence of nature, with its subtle nuances. The power of the stone is transformed into a continuous flow that joins the water, creating plays of reflection and depth. With Smeraldo, the pool becomes an element of nature, where rock and water merge into one, with its organic greens, greys and whites.

Expansion joints

Expansion joints are essential aesthetic elements to ensure the durability and structural efficiency of Bio.design pools. They absorb structure movements due to changes in temperature, dynamic loads and ground settlements.

BOTTICINO

Composed of small dolomitic marble gems, a natural aggregate consisting of rhombohedral Dolomite crystals with the presence of calcitic granules in soft shades. This blend is used to make the Botticino joints, which, combined with our coatings, recreate a reflecting pool with clear, bright colours.

DUNA

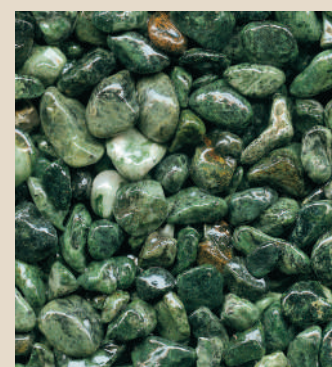

Each individual pebble, with its unique hues and rounded shape, contributes to a cosy and natural atmosphere, evoking the beauty of the mountain ranges' waterways. Duna is one example of the many options available to make your Bio.design pool unique. Duna joints offer an explosion of different colours that range from orangey yellow to white and from salmon pink to dark grey. It is composed of a skilfully mixed fusion of pebbles from two thousand-year-old watercourses, the Rhine and the Ticino.

TICINO

A fine pebble blend, used to line the expansion joints of our beach pools. A textural blend born in the Ticino river, with small marble gems of alluvial origin, shaped by the rushing waters. The Ticino pebble is a varied palette of earthy colours, tending to brown, evoking the watercourses of the mountain ranges. Each individual pebble ball, with its unique hues and rounded shape, contributes to the cosy and natural atmosphere of the pool.

VERDE ALPI

Made from an aggregate composed of serpentine green fragments, it is used for expansion joints and is redolent of the natural beauty of a mountain environment. The warmth and purity of limestone are fused with the quality of emerald marble, creating a new material. The marble, from the Western Alps of the Aosta Valley, is skilfully worked to obtain small, polished pebbles that enrich the pool's joints, amplifying the sensory experience.

Waikiki

Bio.design finish coating

The Waikiki coating is just one example of the many options available to make your pool unique. Composed of fine-grained yellow spherical quartz, this naturally rounded alluvial sand offers a delicate straw-yellow hue. Its soft texture and warm colour recreate the cosy and bright atmosphere of exotic beaches, giving your pool a sophisticated look.

An exotic dream, material essence that merges with the vision of distant beaches. Waikiki, with its delicate surface, recalls the golden, sun-kissed sand, while the reflections of the water create light effects that dance on the skin. Small quartz grains ranging from soft pink to yellow and beige, enriched with amber highlights.

Expansion joints

Expansion joints are essential aesthetic elements to ensure the durability and structural efficiency of Bio.design pools. They absorb structure movements due to changes in temperature, dynamic loads and ground settlements.

BOTTICINO

Composed of small dolomitic marble gems, a natural aggregate consisting of rhombohedral Dolomite crystals with the presence of calcitic granules in soft shades. This blend is used to make the Botticino joints, which, combined with our coatings, recreate a reflecting pool with clear, bright colours.

The marble, from the Western Alps of the Aosta Valley, is skilfully worked to obtain small, polished pebbles that enrich the pool's joints, amplifying the sensory experience.

Goa

Bio.design finish coating

Created from the combination of Sondalo and Waikiki, this coating offers a perfect mix of elegance and shine. Sondalo, a sand extracted from an underground quarry, is characterised by a high degree of whiteness and polyhedral grains. Waikiki, on the other hand, is composed of yellow spherical quartz, a naturally rounded sand of alluvial origin, with a delicate straw-yellow hue; together, these elements create a unique texture, combining the brightness of white with the warmth of yellow, for a welcoming and sophisticated atmosphere.

The alchemy of light, a story of reflections and materials, in which brilliant white blends with golden hues reminiscent of distant, sunny landscapes. The refined and harmonious surface reflects natural light in thousands of directions, creating a tapestry of flashes that move with the water.

Expansion joints

Expansion joints are essential aesthetic elements to ensure the durability and structural efficiency of Bio.design pools. They absorb structure movements due to changes in temperature, dynamic loads and ground settlements.

BOTTICINO

Composed of small dolomitic marble gems, a natural aggregate consisting of rhombohedral Dolomite crystals with the presence of calcitic granules in soft shades. This blend is used to make the Botticino joints, which, combined with our coatings, recreate a reflecting pool with clear, bright colours.

BIO.DESIGN **KOI**

Bio.design small-sized pools

Bio.design Koi pools are fragments of silence, micro-cosms of water that encapsulate the essence of time.

Like the Koi fish, symbol of grace and endurance, these little water gems evoke the stillness of a secret pond, where water lilies skim the water and the surface is alive with reflections of light.

In intimate spaces, nature reveals itself, fluid and boundless, in a whisper of peace. Shapes dissolve, water communicates with quartz, and the soul gets lost, surrounded by a unique harmony.

COSTA PARADISO

COSTA PARADISO, SASSARI, SARDINIA

An exclusive corner of the Sardinian coast, where professional design meets untamed nature, creating a refuge of rare beauty. Romantic beaches, rocky coves, and crystal-clear waters, surrounded by flora, enrich the setting for this Bio.design pool.

Finely coated in Goa, it covers an area of 20m² and represents a true corner of paradise, able of transforming the crystal-clear Sardinian waters, which can be seen in the distance, into a domestic and intimate setting.

The carefully selected blend of yellow spherical quartz, with its delicate straw-like colour, brings to mind the warm, soft golden sands that stretch endlessly under the sun, creating an atmosphere of total immersion in nature.

Its soft texture invites a gentle touch, while the crystal-clear water reflects the purity of the rocky surroundings, creating a continuous play of light and shadow that hugs the senses, instilling a profound perception

of well-being and inner serenity. Every detail has been designed to offer a multi-sensory experience, providing unforgettable moments of peace and bonding with nature.

RIOLO TERME

RAVENNA, EMILIA ROMAGNA

Born from the meeting of earth and water, this Bio.design pool is distinguished by the lush green vegetation that surrounds it. Nature that has welcomed a new element, an object that does not disfigure it but, rather, enriches it with new reflections and nuances.

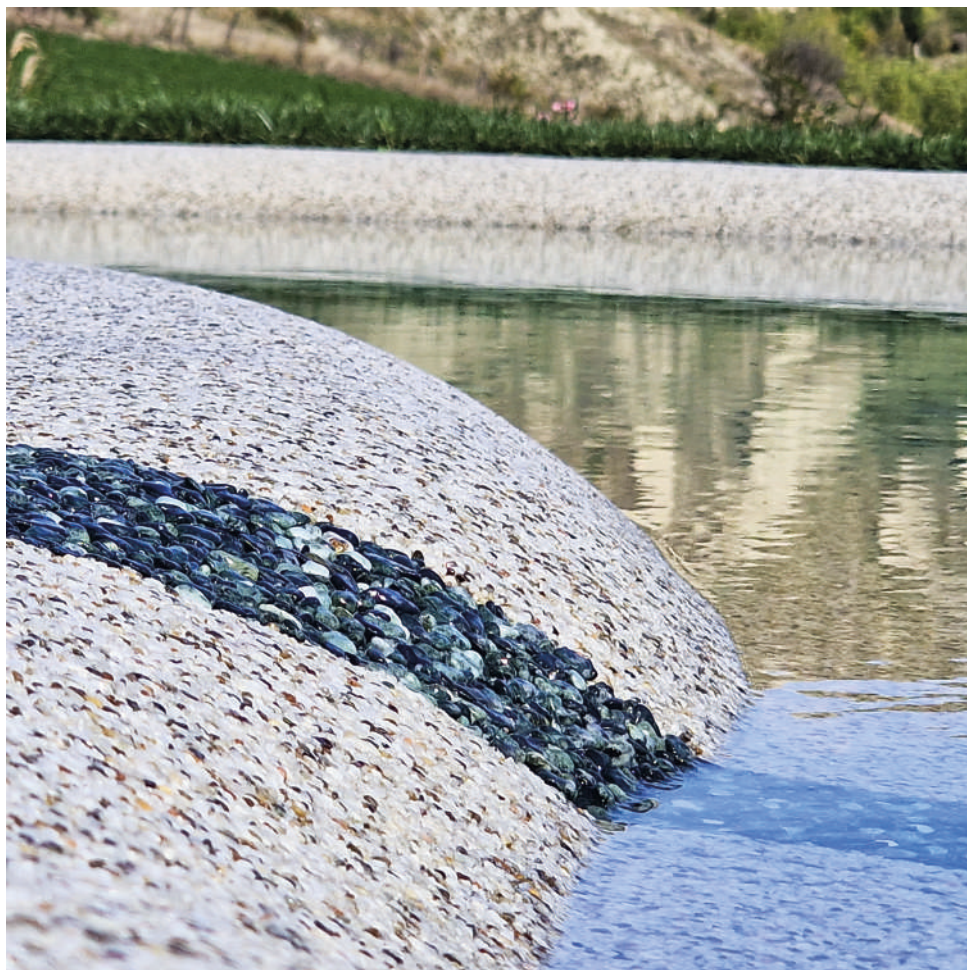

Nestled among the majestic hills and verdant valleys of the province of Ravenna, this 35m² pool blends elegantly into the landscape, like a natural continuation of the terrain. The design includes gradual access via a small

beach, enhanced by gently contoured steps, inviting guests to dive into the clear waters. With a maximum depth of 1.55 metres, every swim is a unique experience, while every dive forges an authentic connection with na-

ture. Daily worries melt away like waves lapping the shore, making way for an immersive and restorative experience.

This corner of unspoiled beauty perfectly reflects the harmony between man and the environment, offering an ideal retreat for those who yearn for a return to nature.

enhancing the architecture and development of the outdoor space. A cosy living area has been created next to the pool for moments of relaxation and conviviality.

The gradual entrance, close to the decking, facilitates access to the pool, while the precious Goa coating enriches and rounds off the view of the outdoor spaces.

BEX

CANTON VAUD, AIGLE, SWITZERLAND

The soothing sound of the water gently winding its way between the stones, combined with the restorative power of the massage jets, transforms this Bio. design pool into a place of pure ecstasy for body and mind.

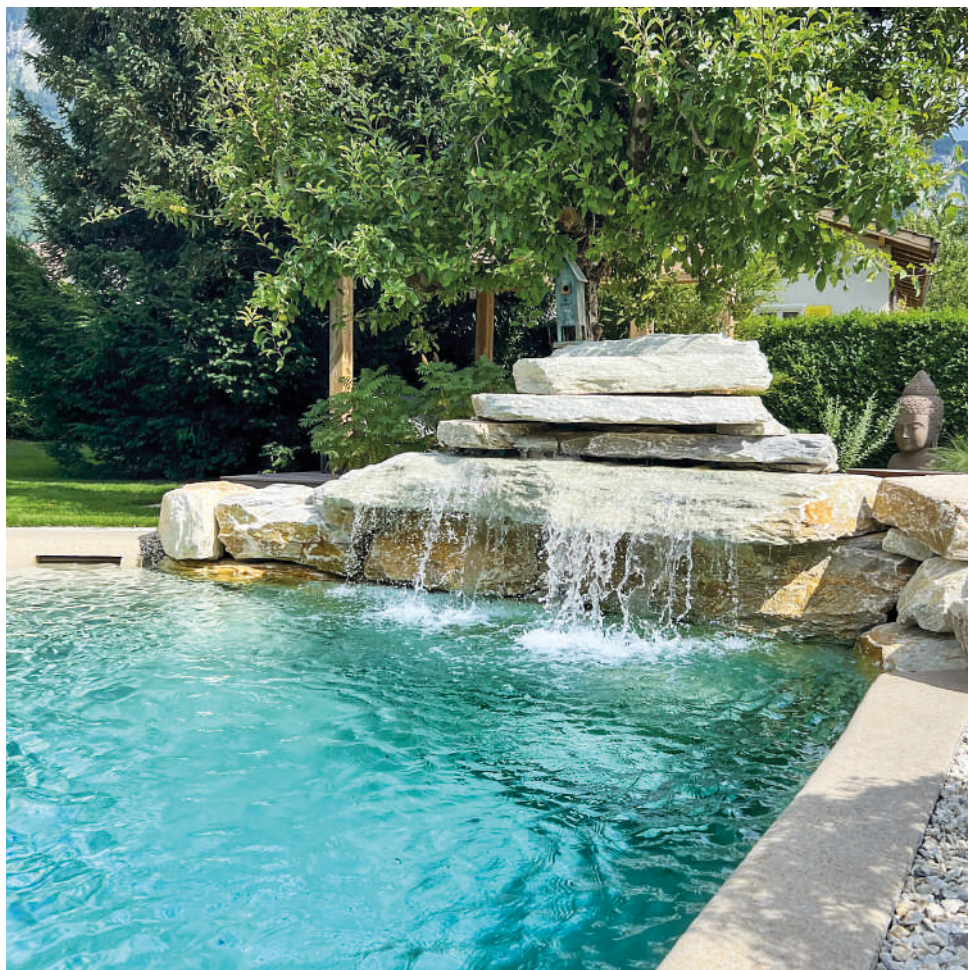

A peaceful corner, where water becomes the common thread of an unparalleled experience. The Goa coating, with its Verde Alpi and Botticino joints, captures light and

transforms it into iridescent reflections that dance on the surface of the water. As the true star, the waterfall, made of granite stones, steals the show, with continuous, plac-

id jets of water. The nozzles, set into the side wall, offer a restorative massage, relaxing the limbs and relieving tension.

With its 35m² of aquatic surface area, cleverly enclosed in a design reminiscent of the waters of a natural lake, this pool invites you to close your eyes and surrender to the rhythm of the waterfall's roar.

ing the long history of the monastery and adding charm to the structure. A pool tailored to human needs, with a large beach dedicated to aerotherapy that lets you unwind and indulge in boundless relaxation. Walls that de-

scend gradually, ideal for small children but also for our four-legged friends, guaranteeing liveability and safety. Bio.design is much more than a pool...endless possibilities, new sensations that offer unique emotions.

VILLA GIULIETTA

CASTIGLIONCELLO, LEGHORN, TUSCANY

A dream stay, just a step away from the sea, in a 19th century villa. An oasis of well-being in the last spur of the Leghorn mountains, enveloped in the briny scent of the sea air. Villa Giulietta enchants with an authentic piece of paradise.

Like a phoenix, this Bio.design creation “rises from the ashes” of a traditional pool. With its 55m² and a depth of about 1.40 metres, it was designed with great care and attention to detail. An atoll that rises up between the hills

and pine forests of Tuscany, silhouetted against the sea. A large beach with aerotherapy is an invitation to relax under the sun, while whirlpool sessions create a moment of pure escape. A water feature, created by the waterfall

gently cascading from an earthenware jug, adds a rustic and charming touch to this Bio.design pool.

The perfection is in the details; this is why we also redesigned the water cistern, finely resined and transformed into a solarium where you can relax and enjoy the Mediterranean scrubland in which this magical place can be found.

OTELLO

VICENZA, VENETO

Simplicity lies in the little things and sometimes there is no need for tinsel that confuses and creates distractions. Body and spirit must be fulfilled by the worship of beauty, enhancing one's Being.

"If nature does not provide the foundations, it will be a matter of seeking them with art", said Andrea Palladio. The Craftsmen, the Artisans, the Pool Artists, are what

make each Bio.design pool an ode to quality and craftsmanship. A steel fountain with its gentle jet, together with a green corner, create an intimate and cosy ambience.

The gradual entrance to the pool traces a gentle, sinuous path, with the water starting to lap against the limbs.

Rocky elements enrich the context, creating new views and perspectives. Palladian architectural proportions split into two semicircles that, when united, form an 8, the symbol of infinity.

The sound of flowing water, a gentle cascade, delicately crashing waves evoke an intimate and relaxing atmosphere, a prelude to a sensual connection with nature and oneself. The shaped beaches around the pool welcome

guests, inviting them for a break under the restorative sun. The palm trees sway lightly, nestled between the thousand-year-old monoliths, like silent guardians of a corner of paradise.

VILLA CURTI

SOVIZZO, VICENZA, VENETO

Studying the past in order to foresee the future, respecting the history of the area and its traditions. The essence of Vitruvian architecture that, with its principles of solidity, functionality and beauty, guides the construction processes of a Bio.design pool.

Proportion, symmetry, and harmony of form, a visual balance that satisfies the sense of beauty. In the heart of Veneto, immersed in the rich historical and cultural tradition of this region, lies Villa Curti, with its 16th century

main building and the foundations of an ancient Bissari castle. The Bio.design pool, set in a vast 30,000m² park surrounding the villa, blends in with the historical heritage: among its ancient stone statues, its English garden,

and its small open-air theatre. A fusion of modernity and classicism, enhanced by the brilliance of Mylago Gold and the pearlescence of Botticino joints.

A context that best embodies the skill of craftsmen who have succeeded one another over the centuries, leading to a rediscovery of the ancient workshops' ingenuity and which, today, we find in the artists of Bio.design pools.

PRIVILEGIUM

LAZISE, VERONA, VENETO

The eternal silence of infinite spaces. Nature enveloping every experience, the horizon peeking out of the mist of the mountains, the fleeting impression of the sun reflecting in the lake...a pool or, perhaps, something more.

A sensation, an immersion in primordial silence that awakens intimacy with nature and invites you to lose yourself in its vastness. Lake Garda stretches out like an endless breath, a place where the silence of infinite space becomes tangible, wrapping the soul in a deep calm.

A 105m² Bio.design pool overlooking the lakefront, standing as a continuation of Lake Garda; a fusion with the sky, while the mountains surround it like ancient

guardians, motionless in their eternal dialogue with time. The Mylago Gold of the flooring, with its warm tones, emanates a golden light that dances on the surface of the water. The Duna pebble, a kaleidoscope of hues ranging from orangey yellow to milky white via salmon pink and

dark grey, enriches the great Garda Moraine amphitheatre. Like an impressionist painting that captures fleeting moments of everyday life, a Bio.design pool evolves with its surroundings, with the clouds drifting by and the sun emerging in the mountainous horizon.

BIO.DESIGN UMI

Bio.design large-sized pools

Umi is infinity, immensity contained in a form that tastes like freedom.

These large pools, like a miniature sea, evoke the open horizon, the depth that beckons and welcomes. Its calm waters seem to reflect distant skies, where thought gets lost and the body is set free.

Umi is a fragment of the ocean, where the sea finds subtle boundaries but the soul feels the echoes of infinity, in a balance between vastness and intimacy.

SANTA ROSA MONASTERY

AMALFI, SALERNO, CAMPANIA

In the words of John Steinbeck, "a dream place that isn't quite real when you are there, but becomes beckoningly real after you have gone". A place where cliffs plunge into the blue Mediterranean and where the air is redolent with the scent of lemons and jasmine.

The Amalfi Coast transports you to a dreamlike, almost surreal dimension, a place that gets its hooks into you, where the frenzy of city life fades like a distant memory. The Path of the Gods leads us to a space that stands in

splendid solitude, once peopled by snow-white cassocks under swaying black veils and now the quintessence of luxury Italian hospitality. Guarding the fishing village on the bay of Conca dei Marini is the Santa Rosa

Monastery, with its 190m² of water blending into the infinite blue of the sea, disappearing between the horizon and the sky. The Goa coating mingles with the waves crashing on the rocks of the bay below, with the Ticino joints tracing the routes of the fishermen crossing the Ferriere Valley.

Colours, scents, and visions: call them emotions, if you want.

CAYO BLANCO

CHIOGGIA, VENICE, VENETO

The epitome of harmony between soft stretches of sand and an endless summer. Having fun is the most enjoyable thing you can do on a carefree day with friends, whether relaxing in the sun or taking a refreshing swim.

An oasis between the sea and the lagoon, with the sun creating new impressions on the golden beaches of the Adriatic. The days flow by peacefully, accompanied by the gentle sound of the waves lapping against the shore and a faint background music heralding the golden hour.

At the centre of the Cayo, there is a 210m² islet whose palm trees reflect a perfect trinity, where the heat of summer, the coolness of the water, and the softness of the sand combine to offer moments of pure relaxation and well-being.

The shimmering, bright Goa coating picks up where the white sand of Sottomarina leaves off. A pool designed to offer an experience that combines fun and well-being, a

sensory exploration that invites guests to discover new nuances of coastal beauty, combining aesthetics and functionality in a setting that enchants and fascinates.

CAMPING OASI

SOTTOMARINA, VENICE, VENETO

The song of the seagulls and the rustle of the wind through the trees of the pine forest create a natural symphony that is the soundtrack of every moment. Children playing in the water and enjoying the magic of being able to dream, amidst the splashing and diving.

Children's dreams are made of imagination, freedom, and endless possibilities, just like a Bio.design pool. A place where young and old find their space to cool off and experience moments of pure joy. While the children

dive under the waterfall gushing from a mushroom, exploring new imaginary worlds, the adults surrender to the well-being the water imparts, lulled by the gentle sound of bubbles. Two pools, one of which is for children, cov-

er an area of 300m² blending perfectly in a green lung of the Venetian lagoon, between the colourful and charming city of Chioggia and the dock that protects the holidaymakers at Camping Oasi.

Mylago Gold together with the Botticino and Ticino joints were chosen to brighten up the days of the campsite's guests, with customisations that are clear references to the place's identity. A perfect example of how to convert a traditional pool into a new experience, providing two different environments tailor-made for different ages and desires.

Mylago Classic shades the turquoise water of the larger pool, reflecting the sunlight in brilliant, enchanting hues. Zones dedicated to aerotherapy and hydro massage, together with the “invisible” Bio.design overflow, add a further layer of sophistication, while the flowing lines of

the Ticino joints are reminiscent of the Greek masters of harmony and proportion. The symbiotic relationship between man and nature drives each of our creations, a perfect balance of shape and function.

ROYAL RIVER

COSTA ADEJE, TENERIFE, SPAIN

Walking on a volcanic island is like exploring a utopian dimension. The majestic Teide, Spain's highest peak, towers proudly above the island, a silent guardian that gifts fiery sunsets and starry nights so clear they look painted. Climbing the volcano is like touching the sky, surrounded by a breathtaking panorama, where silence and vastness make us part of something greater.

Tenerife is more than just natural grandeur: it is a place where you lose yourself and find yourself again. Its cities pulsate with life and culture, amidst the vibrant colours of colonial houses and cobbled streets populated by the scents of the market just a stone's throw from the

ocean. The Royal River Resort conveys these sensations, positioning itself as one of the leading structures in the hospitality world, a forerunner of innovation in the leisure sector. Fibre-optic fireflies can be found between the gaps of the quartz grains in Mylago Gold, which, when

the sun goes down, create a starry sky at the bottom of the pool, transforming it into a scenic aquatic constellation. A 490m² pool surrounds a series of cottages that evoke the unspoilt spirit of Africa, with its simple and authentic architecture.

The Hotel Royal River Resort, proclaimed Spain's best hotel in 2022, was selected from over 100 facilities for the unique Lagoon Villas concept. These dream villas are designed around the Bio.design beach pool, recreating small islands that meet the infinite sea.

POSEIDON RESIDENCE

NESSEBAR, BULGARIA

Interweaving history, culture, and nature, authentic and fascinating experiences that create contrasts between past and present. The Black Sea holds a secret in its depths, a silent and impenetrable world where time seems to stand still.

It is a lifeless abyss that preserves in silence what has been, like an archive of the past waiting to be discovered. It is a sea that lives on two levels: the sparkling vitality of the surface and the motionless mystery of the depths.

In its dualism, the Black Sea becomes a symbol of a fragile and powerful balance, a connection between the visible and the invisible world, between life and eternal rest. A brackish water that preserves but at the same time can re-

gain strength in a new space, between elegant buildings and intimate, cosy pergolas. The Poseidon Residence, in Nessebar, the gem of the Bulgarian coast, with its 550m² Bio.design pool, plays with curves, directing the water as Poseidon did with his trident. The Goa coating with Boticino joints is reminiscent of the golden sands and crys-

tal-clear waters of the beaches of Nessebar, enriched with gazebos and small beaches that are an invitation to total abandon, while the bridges and fountain create a magical atmosphere. At nightfall, the pool is transformed under magical lighting, reflecting brightness and shadow in a play of ambiances that soothes the soul.

RELILAX

MONTEGROTTO TERME, PADUA, VENETO

Beauty as an escape from inner torment. Being in symbiosis with nature, reflecting it and living in harmony with it, cultivating one's spirituality. Regenerating and soothing the wounds of the spirit, using what the Earth has given us.

The Euganean Hills, an area that, after volcanic processes that occurred 35 million years ago, still provides resources to soothe body and mind. The fertile soil, thermal waters and mud have been regenerating the limbs and enriching the spirit since ancient times. The gentle

slopes of the Bio.design "Le Palme" pool at the Hotel Relilax evoke the entrances to the thermal baths where the Romans took refuge to recover their strength. A 600m² pool coated in Waikiki, whose warm straw-yellow colour is reminiscent of the Muscat grapes of the Euganean

Hills, together with Ticino joints that reconnect with the trachyte that populates the hillside area. The “Le Palme” pool is surrounded by verdant hills and designer sun loungers, while the wooden decking brings the cosy ambience of the hotel to the outdoors.

The natural warmth of the thermal water slowly penetrates the inside of the pool, lapping against the skin, promoting deep relaxation, while the aroma of the minerals in the water amplifies the feeling of regeneration. Gentle gurgles flow as steam rises lightly, creating a dreamlike atmosphere.

A pool with a strong visual impact, with curves and lines intertwining in two basins, interspersed with two small green islands. The entrance beaches to the different areas of the pool, equipped with aerotherapy, lend themselves as a sun shelf where one can relax or as

shallow areas for the little ones. The shapes have areas with hydro-massage seats, where one can lie back and enjoy the sun's rays on their body. A work of aquatic art, a white pearl set between sky and sea, a place where time seems suspended and every curve tells a story.

GALLINARA

ANZIO, ROME, LAZIO

Dreaming as if we were to live forever, seeing beyond appearances, imagining new spaces and contexts, and projecting ourselves into new challenges and experiences. Visions, smiles, and emotions.

Dreaming is not just an escape from reality, but an act of construction. In dreams we see beyond, imagining a future that does not yet exist and that we have the opportunity to shape. The visions we

create are not just abstract ideas, but previews of what we can achieve. It is our ability to imagine that lets us turn limitations into opportunities, obstacles into springboards towards something new. A plunge

that encapsulates the ambition to build an entirely overflowing 1300m² Bio-design pool, with swimming areas that merge with the beaches enhanced by aerotherapy and whirlpools. Relaxation and well-being corners, with dedicated children's areas and step-down entrances, ensure maximum enjoyment for all guests of the Parco della Gallinara Camping & Village.

Emotions, smiles, and visions that walk us on the path to what really matters.

reefs that populate Mauritius. The warm kisses of the sun on the skin, the quartz crystals gently caressing every part of the body, refreshments under the jets of the waterfall, which melts away everyday tension,

jetties linking areas of well-being that shape a new pool experience. The palms sway and reproduce the faint rustling of the leaves, guiding the body on a journey of contentment. Bio.design, more than a pool.

ICONIA, THE MINIPOOLICON

THE SOUND
OF RELAXATION

COATINGS ICONIA

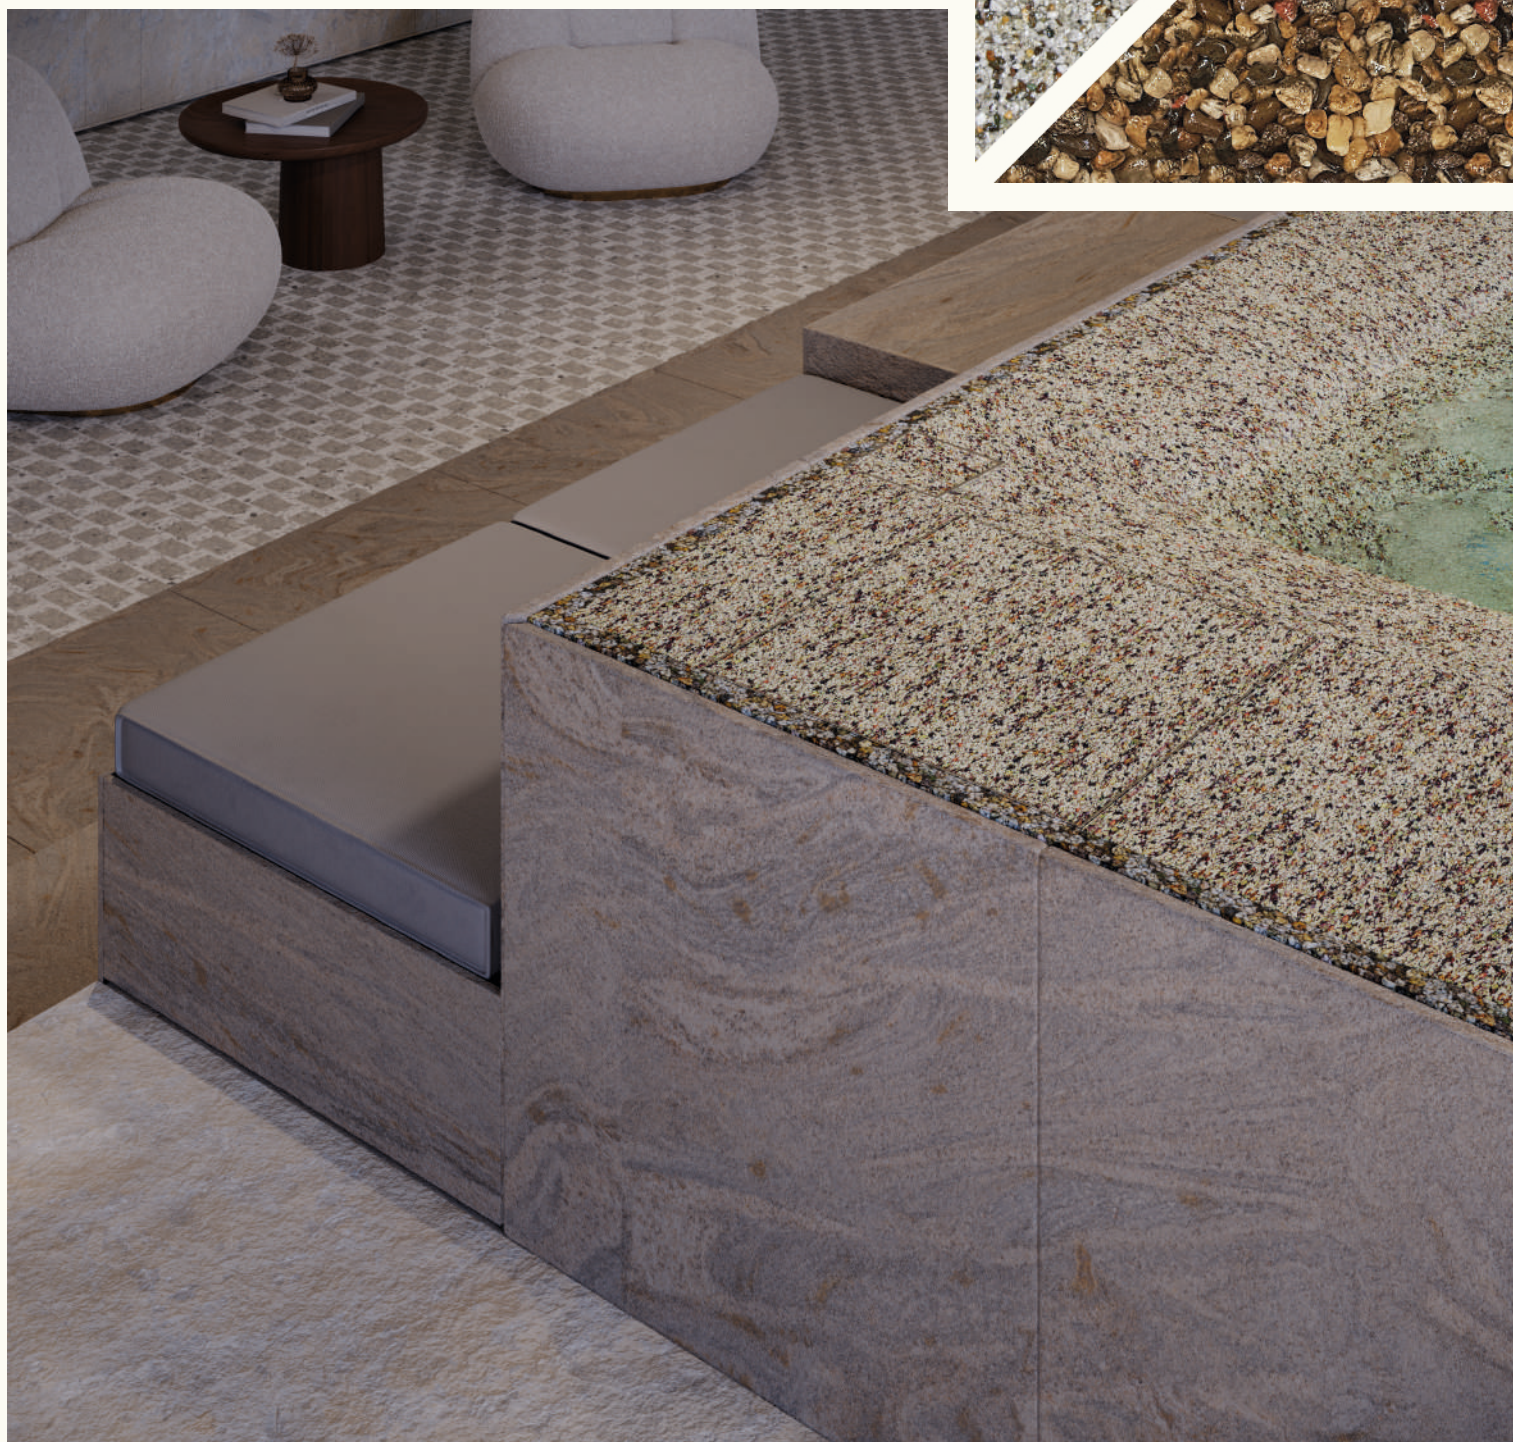

A material journey through quartz, stone and resin purifies spaces and transforms water into the most elegant of dances.
A continuous process of evolution, changing materials: reflections, light and harmony of each stone grain.

ARKAIA

TICINO PEBBLE

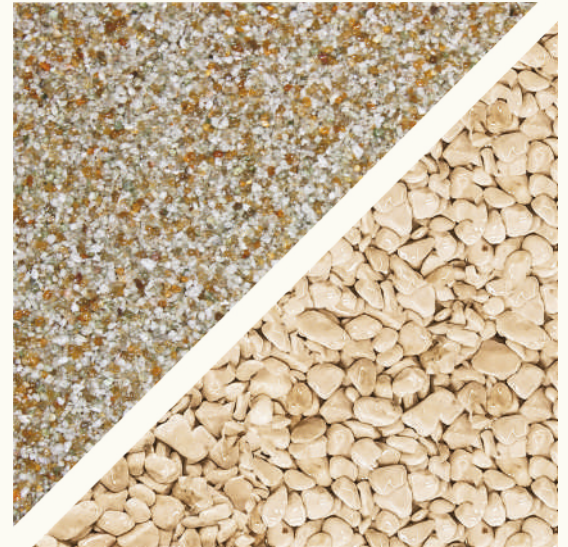

A blend of natural quartz and sands from the banks of the Ticino River to recreate the reflections of turquoise waters. Ticino pebble perimeter inserts in earthy colours.

LUXIA

BOTTICINO PEBBLE

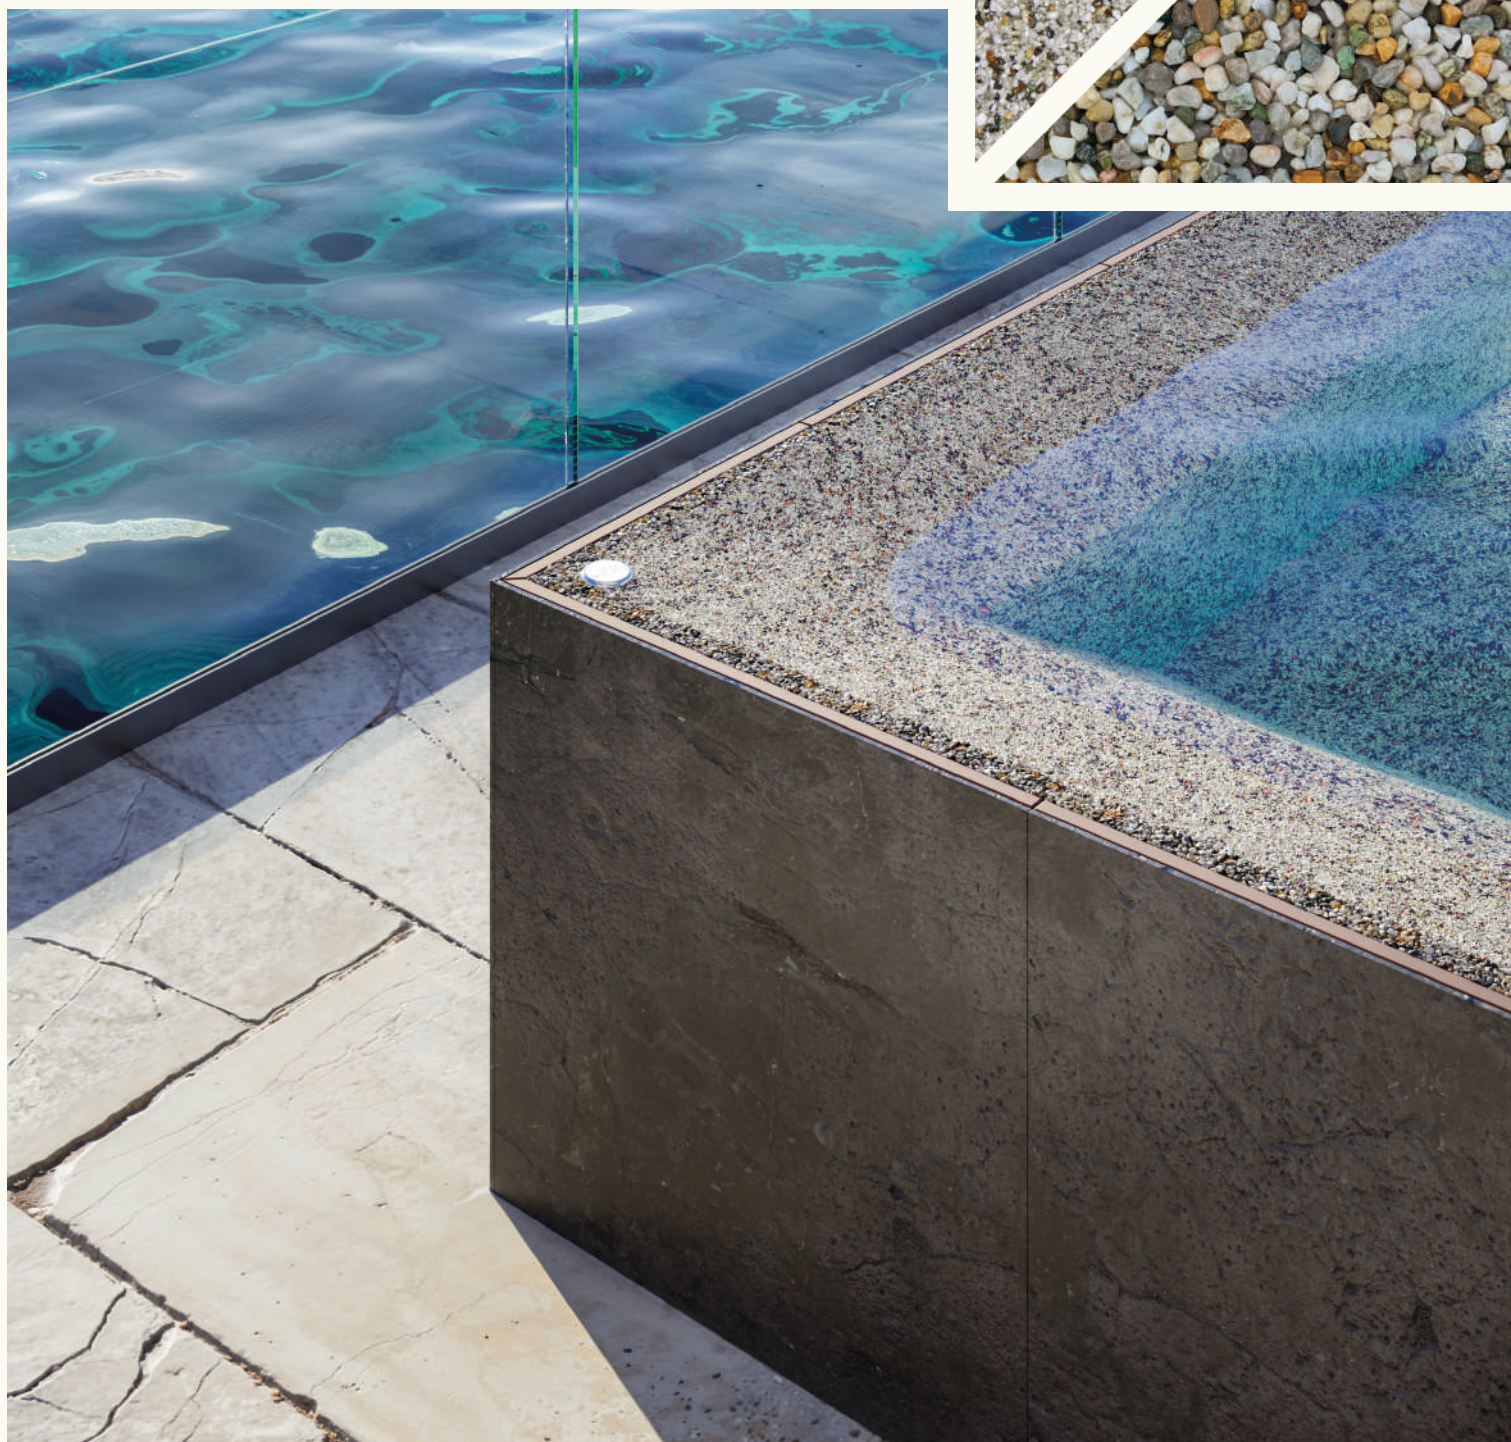

A blend of natural quartz and yellow spherical quartz, quarried from the French Alps. A straw-yellow colour that recreates the chromatic reflections of exotic seas. Small gems of dolomitic Botticino marble embellish the perimeter inserts.

KALOS

DUNA PEBBLE

A mix of quartz and sand that echoes the grain size of the Arkaia coating, gifting the beauty of crystalline reflections. A fusion of pebbles extracted from the Rhine and Ticino rivers makes for an explosion of colours, embellishing the perimeter inserts.

ACCESSORIES ICONIA

Explore the collection of premium accessories for ICONIA and transform your experience. From the NYX cover, which can be walked on and protects, to the KOS perimeter seating, which enriches the space, to the HERMES cushions, which mask the shafts of the technical room, making them functional.

The LITHOS panels covering the outer walls and the KIMERA corner element, which is available in various options, complete ICONIA. Each element is designed to combine design with versatility of use.

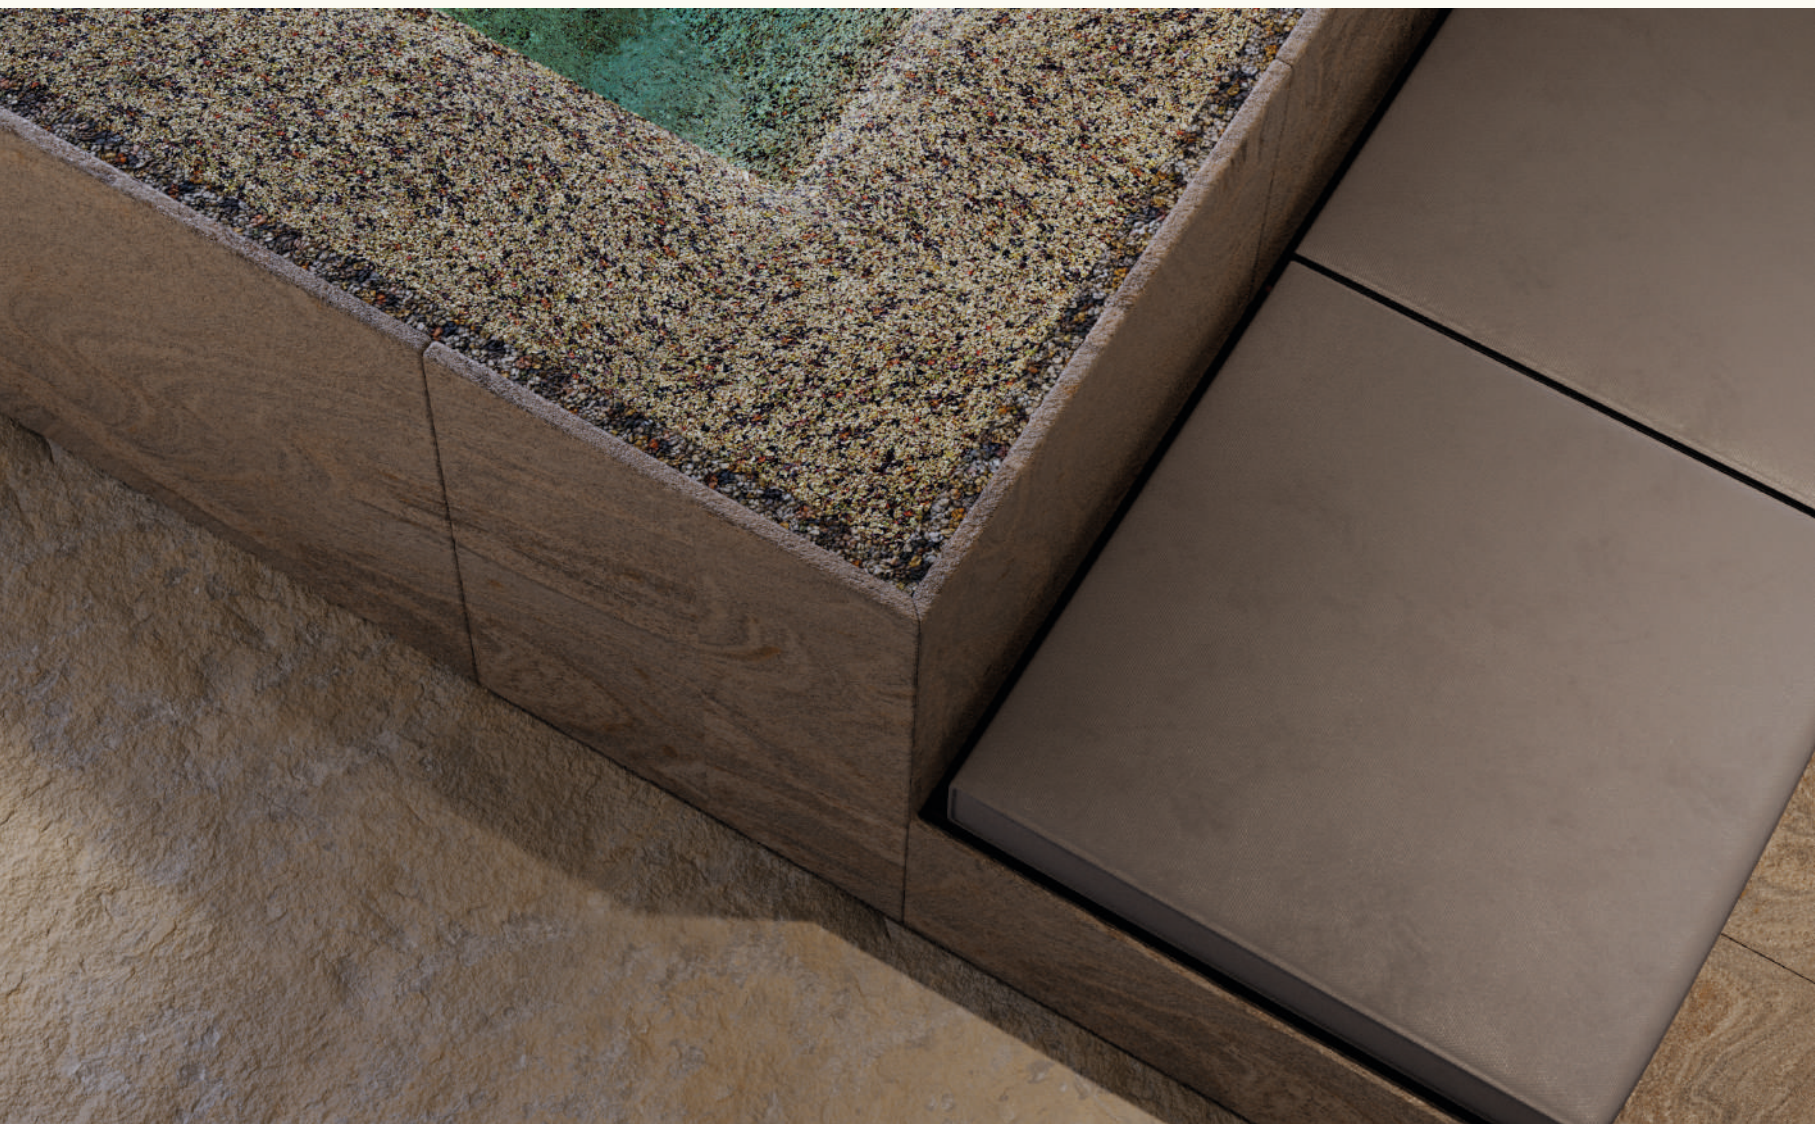

LITHOS

EXTERNAL PANELLING

LITHOS embodies the changing soul of the ICONIA materials. TITAN, a slate coating, offers a robust and material presence, while HECATE, with its texture reminiscent of lunar soil, adds an abstract and welcoming dimension. Exclusive materials fashion the outside space with a fusion of textures, colours, and shades, reshaping the outdoor design experience with a touch of contemporary aesthetics.
